Projects

Front-End Developer Portfolio [🔗](#)

Personal Portfolio Built with React and Modern Web Technologies

Built a personal portfolio website as part of my front-end development practice. The project showcases my skills in HTML, CSS, JavaScript, and React.js. It includes responsive design, modern UI, and structured sections like About, Skills, Projects, and Contact. This portfolio was developed to demonstrate my learning progress and understanding of real-world web development.

Meal Finder – Recipe Search App [🔗](#)

Recipe Finder App with MealDB API Integration

Created a responsive meal search app using HTML, CSS, and JavaScript. Integrated MealDB API to fetch and display recipes with ingredients and instructions.
